I. **Source**

II. **Credibility of Source**
Credible report from IEEE.

III. **Summary of Content and Conclusions**
The report indicates that the process itself of connecting industry, faculty and students as well as gathering the feedback from the meetings yielded valuable input for all involved. In addition, besides the technical skills, the meetings revealed the need for some “soft skills.” The committee reported that better results are obtained when the university and local IEEE chapters worked to run the sessions and invited Industry to come.

IV. **Relevance to the Department of ECE**
There were benefits mentioned in the report that are associated with the IAB involvement already. Relevance is in terms of satisfaction of student body and ability of university to market its students by providing them with an opportunity to be exposed to industry requirements.

V. **Recommendations for the Department or the IAB**
A consistent and targeted opportunity for industry interaction with students and faculty should continue to be fostered.
